Moisture proof and anti-electrostatic package with moisture absorbent material is used, to keep moisture to a minimum.

¥ ╠˘ ° ج ض ƀ ɢ 30Ņ˘ ƀ ɢ 60%RH Ţ Â

Before opening the package, the product should be kept at 30Ņ or less and humidity less than 60% RH, and be used within a year.

When handling the product, touching the encapsulant with bare hands will not only contaminate its surface, but also affect on its optical characteristics. Excessive force to the encapsulant might result in catastrophic failure of the LEDs due to die breakage or wire deformation. For this reason, please do not put excessive stress on LEDs, especially when the LEDs are heated such as during Reflow Soldering.

The epoxy resin of encapsulant is fragile, so please avoid scratch or friction over the epoxy resin surface. While handling the product with tweezers, do not hold by the epoxy resin, be careful.
